

PETER CHEGE

Python Programmer | Backend Developer

+254 713 244 359 | peterchegen12@gmail.com | linkedin.com/in/chege-peter/ | github.com/peter-njoro

SUMMARY

Computer Science graduate passionate about building things that work - and documenting them so future-me doesn't hate past-me. Experienced in Python programming, backend systems, and collaborative project delivery. Seeking a role where I can turn caffeine and problem-solving into reliable software.

EDUCATION

Gretsa University - BSc Computer Science

September 2022 – October 2025

Relevant coursework: Database systems, API Development, Software Engineering Principles.

WORK EXPERIENCE

ALX Africa - Data Science Fellow

(Remote | July 2025 – Present)

- Collaborated with peers on real-world projects, applying, data cleaning, and statistical analysis.
- Practices version control (in both Github and team morale) while meeting sprint deadlines.

Independent Developer - Personal Projects

(2023 - Present)

FaceTrack Lite - Facial Recognition Attendance System (Python, Django, OpenCV, PostgreSQL, Docker)

- Built an attendance system that recognizes students via face encodings, logs unidentified captures, and manages sessions for lecturers.
- Dockerized the app for reproducible deployments; scripted setup so even Monday-morning-me can run it without errors.

Task & Project Management Tool (Python, Django, PostgreSQL, JavaScript)

- Created role-based access, notifications, and real-time search to streamline teamwork.
- Optimized queries and workflows, cutting task processing time by 40% and boosting feature usage by 60%.

Other Projects

- Various full-stack Django apps: REST APIs, AJAX search, and role-based access features. ([Repos](#))

SafetyPlus Consulting Limited - Industrial Attachment

(May 2025 - August 2025)

- Assisted in software development tasks and IT support for internal systems.
- Worked with the team on troubleshooting, documentation, and optimizing workflow processes.
- Gained practical exposure to applying classroom knowledge in a professional environment.

SKILLS

Python programming • PostgreSQL • Git & Docker • Backend development • Data analysis • Communication • Teamwork & collaboration (honed during ALX peer projects)

INTERESTS

AI & Machine Learning

Open Source Projects

Machine Vision
